## Proven History for Surviving Harsh Conditions

DECRA® roofs are a proven system, excelling through some of the harshest weather conditions around the world for over 50 years. Steel is strong and non-combustible (Class A Rated material),\* making it an outstanding performer when it comes to hail and fire. The interlocking panels won't crack, break, warp, curl or split and they are covered by a transferable Lifetime Limited Warranty, including peace of mind coverage for winds up to 120 MPH and hail penetration. A DECRA roof is durable, freeze-thaw resistant and offer richness and beauty that will enhance your home. With the severe weather conditions we have been experiencing, now is a great time for a DECRA stone-coated steel roof to protect your home and family.

*\*Check your local codes for system requirements.*

## DECRA® Metal Roofing

The strength and durability of a stone coated steel roof is combined with the versatile good looks of a tile, shake or shingle profile to give you a DECRA® roofing system. DECRA® panels have a unique interlocking design, that withstands high winds while adding shear strength.

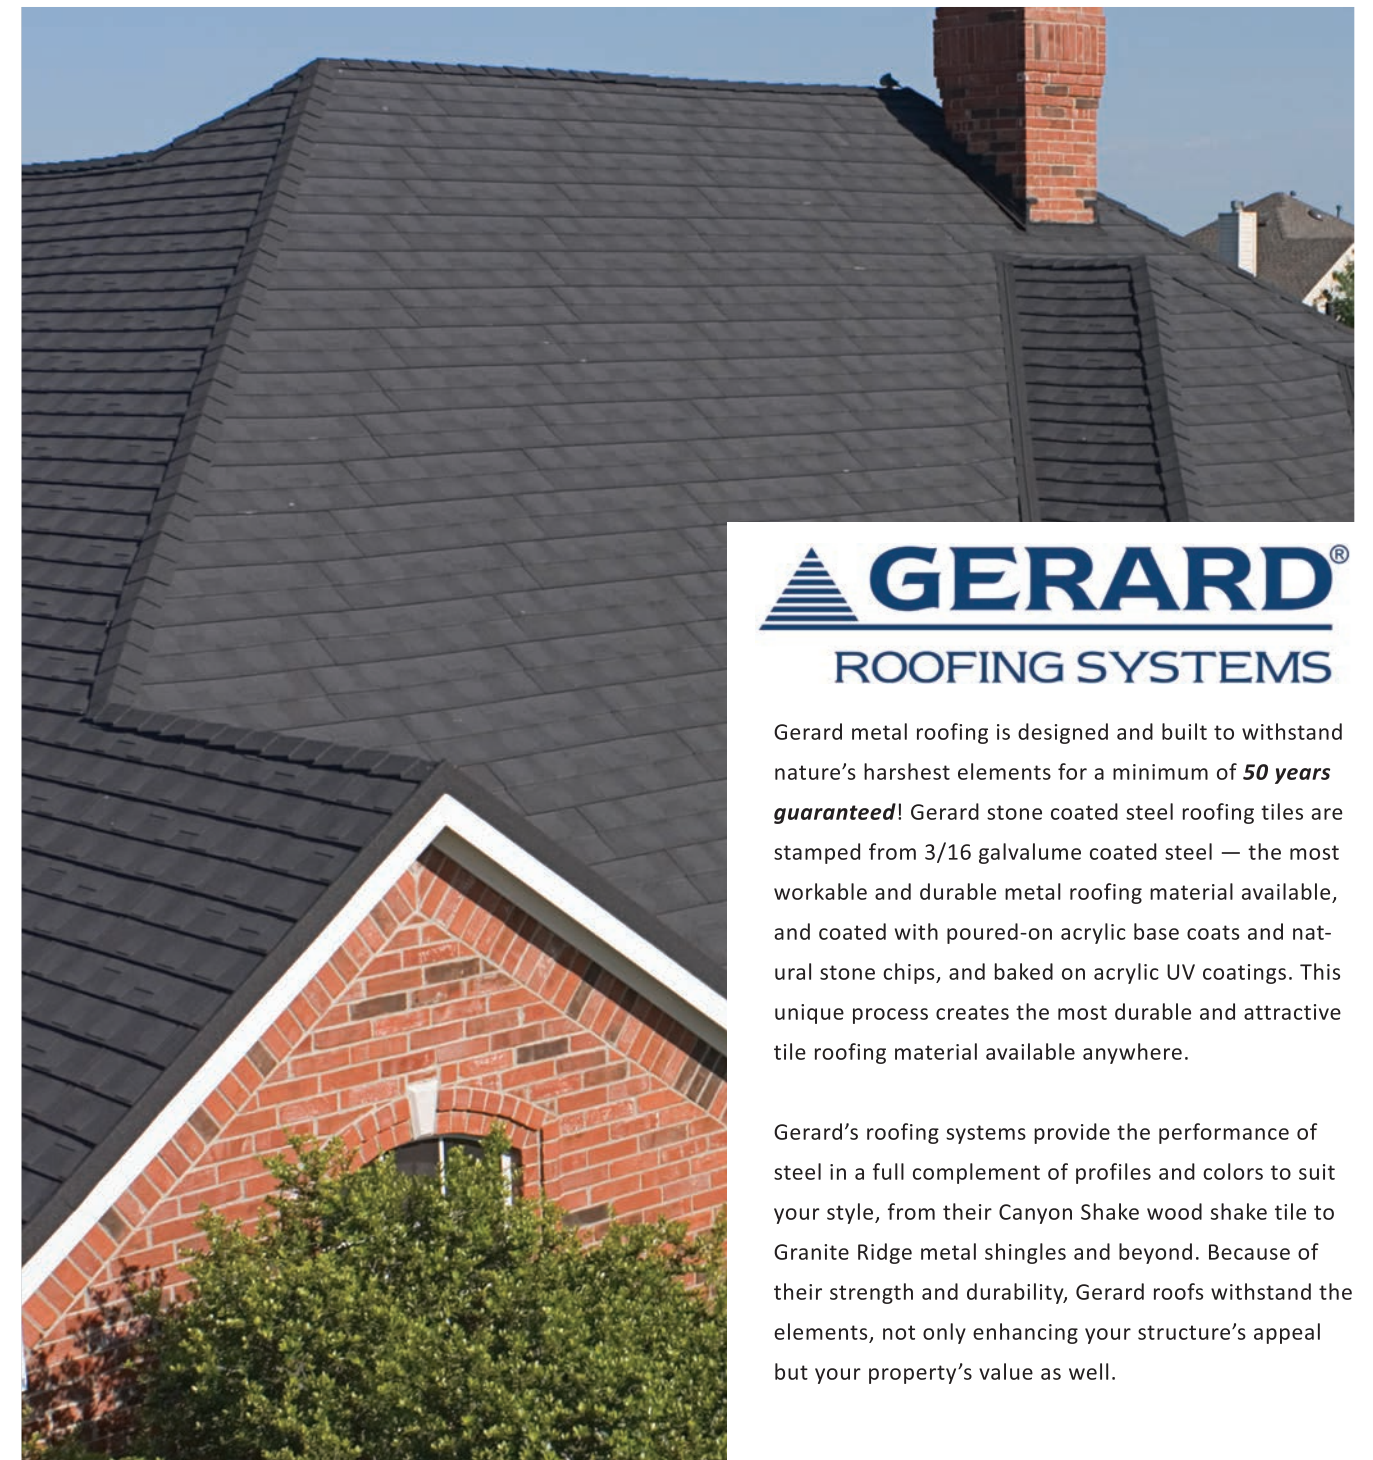

DECRA® Roofing Systems' unique design allows for roofing panels that contain numerous protective layers. Each of these layers serves the dual function of protection or adhesion for the next processing step.

You deserve the best, the original, DECRA® As the original stone coated steel roofing system, the DECRA® product line represents a perfect blending of over 50 years of research and practical experience. Offering the ultimate in performance and engineering design is what DECRA® roofing systems are all about. DECRA® Roofing Systems are made in the U.S.A

STONE-COATED STEEL ROOFING

*You deserve the best... the original DECRA®.*

CHARLES MARTIN METAL ROOFING

## GERARD® ROOFING SYSTEMS

Gerard metal roofing is designed and built to withstand nature's harshest elements for a minimum of **50 years guaranteed!** Gerard stone coated steel roofing tiles are stamped from 3/16 galvalume coated steel — the most workable and durable metal roofing material available, and coated with poured-on acrylic base coats and natural stone chips, and baked on acrylic UV coatings. This unique process creates the most durable and attractive tile roofing material available anywhere.

Gerard's roofing systems provide the performance of steel in a full complement of profiles and colors to suit your style, from their Canyon Shake wood shake tile to Granite Ridge metal shingles and beyond. Because of their strength and durability, Gerard roofs withstand the elements, not only enhancing your structure's appeal but your property's value as well.

*Gerard metal roofing... 50 years guaranteed!.*

Pompeii Ash

Rustico Clay

Venetian Gold

Color Swatches: Due to the printing process, colors may vary from actual product. Please refer to an actual full panel product sample before ordering.

### Villa Tile

#### Classic Elegance of Old World Barrel Tile

DECRA® Villa Tile combines the superior performance of steel with the classic beauty, elegance and architectural detail of an old world Italian tile. Durable and light weight, Villa Tile is walkable and requires little to no maintenance.

Shingle XD – Old Hickory

## Shingle XD

### Shingle at a Fraction of the Weight

DECRA® Shingle XD, with its thick cut edges and deep distinctive shadow lines, provides greater dimensionality and a robust appearance that is ideal if you prefer the look of heavy cut architectural shingles.

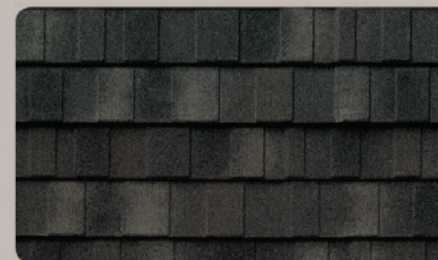

## Shingle XD® Color Blends

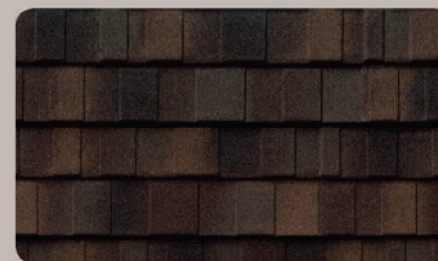

Classic Cobblestone

Midnight Eclipse

Natural Slate

Old Hickory

Color Swatches: Due to the printing process, colors may vary from actual product. Please refer to an actual full panel product sample before ordering.

## Decra Shingle XD

Decra Shingle XD offers the quality and industry proven concept of Decra Shingle, with a heavier, bolder appearance. It has thicker cut edges and deep distinctive shadowlines.

This profile looks great on traditional styled homes and is ideal for those wanting the look of heavy-cut wood shingles.

DECRA Shingle XD is pressure formed aluminum-zinc alloy coated steel with an acrylic bonded stone chip finish. The stone coating resists fading and UV penetration.

Tile – Terracotta

## Tile

Beauty and Style of Mediterranean Tile

A DECRA® Tile\* Roof adds a unique elegance to any home, providing the ideal alternative to any traditional tile products for over 50 years.

CHARLES MARTIN METAL ROOFING

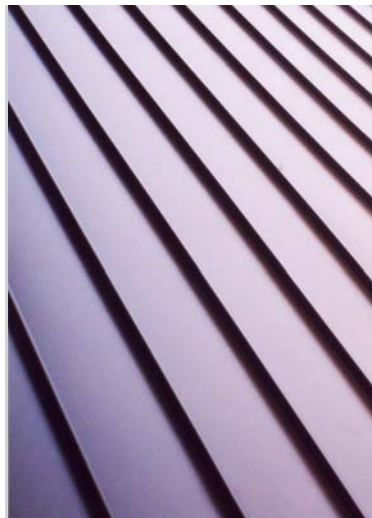

## Traditional Metal Roofing

Traditional metal roofing for commercial or residential

## TRADITIONAL Standing Metal Seam

When most homeowners begin thinking about a metal roof, all they can envision are the roofs they have seen on barns and commercial buildings. Those types of metal roofs typically have panels that run vertically up the roof. These types of metal panel roofs are called "Standing Seam" because their prominent visual feature is the raised interlocking seam which joins one panel to the next. Often called "commercial roofing," or even "barn roofing," these products do provide the great protection and durability for which metal is known.

### ClickLock Standing Seam

For homeowners who want a metal roof with a traditional appearance, ClickLock is designed to be the best. The stainless fastening clips and screws ensure secure and lasting attachment with no chance for problems resulting from expansion and contraction. The trims used to complete a ClickLock roof have also been carefully designed for beauty and durability.

## R Panel Metal Roofing

### What is an R panel?

The R Panel is a low-maintenance, durable alternative to conventional roofing. It's ideal for retro-fitting over existing composition shingles, and it saves time, labor and disposal costs, which means a lower total project cost. Choose from many designer colors for a sleek, attractive appearance.

## Commercial Roofing

### Commercial Metal Roofing in Colleyville, Bedford and the Greater Dallas / Fort Worth Area.

Charles Martin Metal Roofing is a full service commercial roofing company in Colleyville, Bedford and the greater DFW area. From single day service calls to multimillion dollar roofing projects, we stand by our work. Charles Martin Metal Roofing holds Master Roofing Contractor status, and is certified by most major roofing manufacturers in the industry. We insure that all work will be performed in strict compliance to all Local, State, and Federal Regulations.

# Other Metal Roofing

**K**ey drivers in a building design's success are increasing energy efficiency while reducing operating and maintenance costs. The key benefit of metal roofing and wall panels is that they positively impact building performance by providing longevity, durability and sustainability. These benefits outweigh the performance of traditional shingles.

A study by the Metal Construction Association (MCA) showed the life-expectancy of low-slope unpainted 55% Al-Zn alloy coated, commonly referred to as

Galvalume®, steel standing seam metal roofing (SSR) system is 60 years. The service life of a commercial building is also 60 years, according to LEED v4, essentially meaning a Galvalume metal roof does not require replacement. This benefits both building owners and the environment by lowering the demand to produce replacement roofing systems.

Tilcor products are suitable for all climates and environments around the world.

### Tilcor Roofing Systems

Tilcor is manufactured by the Ross Roof Group who has been involved in roofing over 4 generations since 1942. Its stone-coated steel roofing systems incorporate cutting-edge Zinalume protective steel, which gives the tiles a significantly longer service life than typical galvanized tiles. Tilcor products provide a more visually pleasing finish and exceptional long term durability.

Installed in over 80 countries, the Tilcor Roofing Systems product range offers exceptional strength and durability in the harshest climates. Water-tight and fire and earthquake resistant, their pressed steel roofing tiles can withstand hurricane-force winds and are backed by a Tilcor Roofing Systems warranty.

CHARLES MARTIN & SON ROOFING

# Customer Testimonials

### Fellow Homeowners,

I have lived in the Lakes of Somerset in Colleyville, Texas for over 26 years and Charles Martin & Son Roofing has taken care of my roofing needs for over half of that time, about 13 years.

Everyone in this company that I have come in contact with has been professional as well as exhibiting quality and pride of work that is most appreciated and sometimes too rarely found in these times in which we live.

*Cindy McCord*

DECRA Roofing Systems pioneered stone coated steel in 1957, and remains committed to providing the most durable, energy efficient and beautiful products for homeowners in over 120 countries. Our Corona, California USA plant is proud to produce quality products for Charles Martin and Son Roofing.

*DECRA Roofing Systems*

We just had a new roof put on by Charles Martin Roofing. I am so pleased with my new roof which keeps our home much cooler.

*Dr. and Rev Wm Wildey*

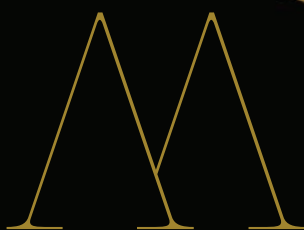

I would not hesitate to have Charles "CD" Martin replace or repair my roof... it's always quality materials and he never cuts corners.

I highly recommend that you consider Charles Martin & Son Roofing for your roofing needs. They will continue to be my first choice, now and in the future.

“  
Hard working, dependable, fast, and always pleasant  
”
